

Ecore Floors...Engineered for Physical Therapy and Rehabilitation

Ecore is pleased to support the HSS Rehabilitation Network as a qualified vendor.

Ecore floors are performance surfaces that support the patient and therapist through the recovery process.

- Manufactured in Lancaster, PA our products are engineered specifically to address Ergonomic, Safety and Acoustic concerns in the clinical space.
- Force reduction, energy restitution and enhanced acoustic properties result in a floor that supports the effort of the patient and the therapist on the road to recovery.

Ecore is pleased to support the HSS Network by providing our products at a discounted price to help manage capital budgets.

All HSS Network members will received a 10% additional discount above and beyond standard volume-based prices.
